

You, the FCC, gave XM Satellite Radio the spectrum needed for a nationwide Radio Network. Let it do it's job - inform the public. I can get Weather and Traffic from AM Radio, FM Radio and Television; there is not a single logical reason why I shouldn't be able to get it from a Satellite Radio Channel.

It is being opposed solely from an economic point of view by the NAB.

On top of everything, I pay for the Satelliter Radio, but do NOT pay for radio and TV stations. I also pay for Direct TV, which broadcasts Weather today; if Direct TV can do it, why restrict XM Radio from also doing it????
